## Course Description: Prehistoric Dinosaurs 101: A Natural History

---

This course will review the 180 million “Age of the Dinosaur,” the Mesozoic Era. The Mesozoic Era is characterized by the evolution of many species and marked by two major extinction events at the beginning and end. Most notably, it is known for the period when dinosaurs reigned and dominated the planet.

In this class, we will investigate major plant and animal groups that emerged during the Mesozoic Era. Students will be able to:

- Identify and discuss the three major periods of the era
- Discuss the shifting of world climate, geography, and the effects on living species
- Explore our fascination with these larger than life creatures in popular culture and how they continue to sustain their popularity
- Identify various dinosaur species and other animal species and how they adapted to their environments

Get ready to learn about these incredible creatures!

### Your Instructor

Dan Elfawal has a Masters in Special Education/Elementary Education, is a Board Certified Behavior Analyst, and a certified yoga instructor. He has been educating children and adults for over 15 years. At PBS Consulting & Psychological Resources, P.C., Dan has provided education consultation and crisis counseling, parent training, job development and coaching, and SEIT services. He has worked in various settings, including K-12 classrooms, colleges, and the greater Long Island community.

*PBS Adult Education classes are taught using various instructional methods tailored to the specific needs of adult learners. Students will be encouraged to develop critical thinking, research and study skills, and utilize technology for learning and collaboration. All students benefit from being engaged with interesting material and collaborating with other students.*
