Course Description - Creative Writing

This course will explore the ways we read and write creatively using various forms such as poetry, text messages, graphic novels, advertisements, and more! Students will learn about these different forms of creative writing and how their own creative expressions convey messages and understanding that may change based upon the interpretation of the reader/listener. In addition to learning the different forms of creative writing, students will write their own and interpret the work of other students with constructive and supportive feedback.

Your Instructor: Amanda Adragna

Amanda is currently an NYC DOE teacher with a concentration in behavior analysis and science. Currently, I hold a master's in elementary special education and general education and am pursuing my clinical psychology doctoral degree. For over 8 years, I have worked with individuals with disabilities and children from many different areas around New York City. In my spare time, I enjoy reading, writing, and spending time with family and friends. Writing has always been a passion of mine and I love exploring new writers with varying poetry styles and different elements of figurative language that can enhance my writing and speech.

PBS Adult Education classes are taught using various instructional methods tailored to the specific needs of adult learners. Students will be encouraged to develop critical thinking, research, and study skills, and utilize technology for learning and collaboration. All students benefit from being engaged with interesting material and collaborating with other students.
