LIVE ACTION DISNEY FILMS: A COMPARATIVE ANALYSIS

Mondays 10:00 am-11:30 am; Instructor: Courtney Braun

We are entering a new world of Disney! With the recreation of classic films that we have loved for years, some say that we have entered the second renaissance of Disney. Technological advancements have been made to further develop characters such as candles, lions, and mermaids! Students will learn how these beloved characters came to life in a new style of animation, as well as the technological processes behind a live-action film. Students will explore and reflect on differences and similarities between the original film and the live action version as well as share their opinions in an analytical review. Examples of some films that may be reviewed in class are Beauty and the Beast, Cinderella, Lion King, and The Little Mermaid. ***Please note that a potential class meet-up may be implemented in this course. While not mandatory to participate, students and staff are responsible for any additional fee that may be needed.***
